== Series overview == Born in the Province of Massachusetts Bay, Franklin became a successful newspaper editor and printer in Philadelphia, the leading city in the colonies, publishing The Pennsylvania Gazette at age 23. He became wealthy publishing this and Poor Richard's Almanack, which he wrote under the pseudonym "Richard Saunders". After 1767, he was associated with the Pennsylvania Chronicle, a newspaper known for its revolutionary sentiments and criticisms of the policies of the British Parliament and the Crown. He pioneered and was the first president of the Academy and College of Philadelphia, which opened in 1751 and later became the University of Pennsylvania. He organized and was the first secretary of the American Philosophical Society and was elected its president in 1769. He was appointed deputy postmaster-general for the British colonies in 1753, which enabled him to set up the first national communications network.

Italian people – living in the Italic peninsula or abroad – have been throughout history the source of important inventions and innovations in the fields of writing, calendar, mechanical and civil engineering, musical notation, celestial observation, perspective, warfare, long

distance communication, storage and production of energy, modern medicine, polymerization and information technology. 309cf6c71f Lavoisier is noted for his discovery of the role oxygen plays in combustion, opposing the prior phlogiston theory of combustion. He named oxygen (1778), recognizing it as an element, and also recognized hydrogen as an element (1783). By using more precise measurements than previous experimenters, he confirmed the developing theory that, although matter in a closed system may change its form or shape, its mass always remains the same (now known as the law of conservation of mass), which led to the development of the balanced physical and chemical reaction equations that we still use today. 309cf6c71f

I usually use a mouse with a scroll wheel to navigate firefox. This is especially useful, as clicking the scroll wheel on a tab closes it, while clicking it on a link opens the link in a new tab. However, I have been unsuccessful at getting this function to work with that button on the laptop that is roughly analogous to the scroll wheel on a mouse (is there a name for that button?). Does anybody know how to implement these features with a laptop mouse, or is this impossible?
