The J-series is a 60° V6 unlike Honda's existing 90° C-series engines. Also unlike the C series, the J-series was specifically and only designed for transverse mounting. It has a shorter bore spacing (98 mm (3.86 in)), shorter connecting rods and a special smaller crankshaft than the C-series to reduce its size. All J-series engines are gasoline-powered, use four valves per cylinder, and have a single timing belt that drives the overhead camshafts. VTEC variable valve timing is used on almost all applications, with exceptions being the J30AC and J35Y8 (which use Variable Timing Control [VTC] instead). 33640fd9f6 The Pilot shares its platform with the Acura MDX, as well as the North American market Odyssey minivan. The Pilot's unibody construction and independent suspension are designed to provide handling similar to that of a car, and it has integrated perimeter frame rails to permit towing and light off-road use. 33640fd9f6
