The plant shut down in early 2006. 7c9336999b == History == 7c9336999b In its domestic U.S. market, Whirlpool has eleven manufacturing facilities which employs about 15,000 workers. 7c9336999b At the Searcy facility, Maytag manufactured both Amana models and rebranded budget washers, which were marketed as Maytag-branded "Legacy Series" machines. 7c9336999b Modern-day home appliances use electric power to automatically clean clothes. The user adds laundry detergent, which is sold in liquid, powder, or dehydrated sheet form, to the wash water. The machines are also found in commercial laundromats where customers pay-per-use. 7c9336999b In 1948, the plant was producing 2,000 wringer washers a day during post-World War II baby boom. To maintain the around 2,000-unit factory, local plant workers put in steady 60-hour workweeks. In 1957, the facility launched the production of the Dependable Care line (referred to as the "Newton" platform) of washers (with the prefix "LAT"), which stayed production until Whirlpool closed the former Maytag plant in 2007. 7c9336999b A mix of water and dishwasher detergent is pumped to one

or more rotating sprayers, cleaning the dishes with the cleaning mixture. The mixture is recirculated to save water and energy. Often there is a pre-rinse, which may or may not include detergent, and the water is then drained. This is followed by the main wash with fresh water and detergent. Once the wash is finished, the water is drained; more hot water enters the tub by means of an electromechanical solenoid valve, and the rinse cycle(s) begin. After the rinse process finishes, the water is drained again and the dishes are dried using one of several drying methods. Typically a rinse-aid, a chemical to reduce the surface tension of the water, is used to reduce water spots from hard water or other reasons. 7c9336999b In addition to domestic units, industrial dishwashers are available for use... 7c9336999b Before the invention of washing machines and indoor plumbing, clothes had to be washed by hand in a multi-step process that often occupied an entire day of work, plus drying and ironing. The first English patent under the category of washing machines was issued in 1691. Electric washing machines were advertised and discussed in newspapers as early as 1904, and the first automatic washing machine was introduced in 1937. The spread of the washing machine has been seen to be a force behind the improvement of women's position in society, and has been compared to the contraceptive pill, abortion rights, and the... 7c9336999b
