The United States Environmental Protection Agency (EPA) Fuel Economy Regulations for 1977 and Later Model Year (dated July 1996) includes definitions for classes of automobiles. Based on the combined passenger and cargo volume, large cars (full-size cars) are defined as having an interior volume index of more than 120 cu ft (3.4 m³) for sedan models, or 160 cu ft (4.5 m³) for station wagons. 00833f2e9e == Classification standards == 00833f2e9e Originating in North America, the term crossover was initially used for any vehicle that blends characteristics between two different kinds of vehicles; over time, crossover came to refer predominantly to unibody-based SUVs. The term SUV is often used as an umbrella term for both crossovers and traditional SUVs due to the similarities between them. 00833f2e9e The term is relative and unavoidably subjective, reflecting both objective qualities of a car and the projected and perceived image of the vehicle's marque. Luxury brands rank above premium brands, though there is no clear distinction between the two. 00833f2e9e There is no commonly agreed-upon definition of an SUV, and the term's usage varies across countries. Thus, it is "a loose term that traditionally covers a broad range of vehicles with four-wheel drive." Some definitions claim that an SUV must be built on a light truck chassis; however, broader definitions consider any vehicle with off-road design features to be an SUV. A crossover SUV is often defined as an SUV built with a unibody construction (as with passenger cars); however, the designations are increasingly blurred because of the capabilities of the vehicles, the labelling by marketers, and the electrification of new models. 00833f2e9e The segment is particularly popular in Europe, India, and Brazil where they account for 37 percent, 75 percent, and 69 percent of total SUV sales in 2018 respectively. In 2019, the best selling subcompact crossover was the Honda HR-V, recording 622,154 units being sold worldwide. 00833f2e9e The predecessors to SUVs date back to military and low-volume models from the late 1930s, and the four-wheel-drive station wagons and carryalls that began to be introduced in 1949. Some SUVs produced today use unibody construction; however, in the past, more SUVs used body-on-frame construction. During the late 1990s and early 2000s, SUV popularity increased significantly... 00833f2e9e == Blazer trim line (1998) == 00833f2e9e
