Tracing back to ancient times, Himalayan Sheepdogs were guardians and companion for shepherds as well as Nepalese monasteries. Due to the decline in nomadic lifestyles, the population has also been in decline, though there are still dedicated breeders and enthusiasts working to preserve and promote the breed. The breed is recognized by International Kennel Club under the name bhote kukur. d0f71fe15f Sled dogs have been used in the Arctic for at least 8,000 years and, along with watercraft, were the only transportation in Arctic areas until the introduction of semi-trailer trucks, snowmobiles and airplanes in the 20th century, hauling supplies in areas that were inaccessible by other methods. They were used with varying success in the explorations of both poles, as well as during the Alaskan gold rush. Sled dog teams delivered mail to rural communities in Alaska, Yukon, Northwest Territories and Nunavut. Sled dogs today are still used by some rural communities, especially in areas of Russia, Canada, and Alaska as well as much of Greenland. They are used for recreational purposes and racing events, such as the Iditarod Trail and the Yukon Quest. d0f71fe15f == History == d0f71fe15f

Mastiff Mastiffs have historically been guard dogs, protecting homes and property, although throughout history they have been used as hunting dogs, war dogs and for blood sports, such as dog fighting, bull-baiting, bear-baiting, and even lion-baiting. Mastiffs are among the largest dogs, and typically have a short coat, a long low-set tail and large feet; the skull is large and bulky, the muzzle broad and short (brachycephalic) and the ears drooping and pendant-shaped. European and Asian records dating back 3,000 years show dogs of the mastiff type. bandogges, although technically the term "bandog" meant a dog that was tethered by a chain (or "bande") that would be released at night; the terms "mastiff" A mastiff is a large and powerful type of dog d0f71fe15f

Samoyed dogs are most often white, and can have a brown tint to their double-layer coat, which is naturally dirt-repellent. They have been used in expeditions in both Arctic and Antarctic regions, and have a friendly and agreeable disposition. d0f71fe15f

Pit bull In the United States, the term is usually considered to include the American Pit Bull Terrier, American Staffordshire Terrier, Staffordshire Bull Terrier, American Bully, and sometimes the Bull Terrier, along with any crossbred dog that shares certain physical characteristics with these breeds. In other countries, including the United Kingdom, the term is used specifically for the American Pit Bull Terrier, excluding the Staffordshire Bull Terrier. Most pit bull-type dogs descend from the British bull and terrier, a 19th-century dog-fighting type developed from crosses between the Old English Bulldog and the Old English Terrier. American Kennel Club was faced with a dilemma: whilst not wishing to condone dogfighting, there was a desire to recognize a uniquely American dog breed for Pit bull is an umbrella term for several types of dog believed to have descended from bull and terriers d0f71fe15f

The Eurasier is a balanced, well-constructed, medium-sized Spitz (Spitzen) type dog with prick ears. It comes in different colors: fawn, red, wolf-grey, solid black, and black and tan. All color combinations are

allowed, except for pure white, white patches, and liver color. Fédération Cynologique Internationale (FCI) standards call for the Eurasier to have a thick undercoat and medium-long, loosely lying guard hair all over the body, with a short coat on the muzzle, face, ears, and front legs. The tail and the back of the front legs (feathers) and hind legs (breeches) should be covered with long hair. The coat on the Eurasier's neck should be slightly longer than on the body, but not forming a mane. The breed may have a pink, blue-black, or spotted tongue.

Historical and archaeological evidence suggests that mastiffs have long been distinct in both form and function from the similarly large livestock guardian dogs from which they were most likely developed; they also form separate genetic populations. The Fédération Cynologique Internationale and some kennel clubs group the two types together as molossoid dogs; some modern livestock guardian breeds, such as the Pyrenean Mastiff, the Spanish Mastiff and the Tibetan Mastiff, and an extinct draught dog called the Belgian Mastiff, have the word "mastiff" in their name, but are not considered.

History

The event has long been associated with the various incarnations of New York City's Madison Square Garden, which hosted the event nearly uninterrupted from 1877 to 2020. Its hosting streak was disrupted in 2021 due to the COVID-19 pandemic; from 2021 to 2024, the event was delayed to a late-spring/early-summer scheduling and held at outdoor venues instead, with the 2021 and 2022 editions held on the grounds of the Lyndhurst mansion in Tarrytown, New York, and the 2023 and 2024 editions held at Billie Jean King National Tennis Center and Arthur Ashe Stadium in Queens.

During the 1880s the 3rd Earl of Malmesbury, the 6th Duke of Buccleuch and the 12th Earl of Home collaborated to develop and establish the Labrador Retriever breed. The dogs Buccleuch...

Pit bull-type dogs have a controversial reputation as pets internationally, due to their history in dog fighting, the number of high-profile attacks documented in the media over decades, and their proclivity to latch on while biting. Proponents of the type and advocates of regulation have engaged in a contentious nature-versus-nurture debate over whether aggressive tendencies in pit bulls may be appropriately attributed to owners' poor care for and competency.

In the 1830s the 10th Earl of Home and his nephews, the 5th Duke of Buccleuch and Lord John Scott, imported progenitors of the breed from Newfoundland to Europe for use as gun dogs. Another early advocate of these Newfoundland fishing dogs was the 2nd Earl of Malmesbury, who bred them for their expertise in waterfowling.

Labradors are often friendly, energetic and playful. It was bred as a sporting and hunting dog, but is widely kept as a companion dog. Though content as a companion, these dogs are intelligent and require both physical and mental stimulation. It may also be trained as a guide or assistance dog, or for rescue or therapy work.

Himalayan Sheepdog The Himalayan Sheepdog is also used to assist in hunting. Closely related to the slightly larger The Himalayan Sheepdog, known locally by various names including the Bhote Kukur, Bhotia, Gaddi Kutta or Bangara, and sometimes called the Himalayan Mastiff, is a breed of livestock guardian dog from the Himalayas, covering Nepal and India. The breed is primarily used as a livestock guardian dog, protecting flocks of yak and sheep from various predators, and as a property guardian dog; unusually for a livestock guardian, the breed is also used to assist with herding.

preserve and promote the breed. The breed is recognized by International Kennel Club under the name bhote kukur. The Himalayan Sheepdog is found in the Himalayan foothills from eastern Nepal to Kashmir

). Identification tags and medical information are often placed on dog collars. Collars are often used in conjunction with a leash for restraining a dog. Collars can be traumatic to the trachea if the dog pulls against the restraint of the leash, causing severe pressure to the neck. Use of a harness instead of a collar may be beneficial for dogs prone to tracheitis or those with a collapsed trachea. Conversely, dog breeds with slender necks or smaller heads may easily slip out of collars that are too loose. This can be avoided by using a martingale dog collar which tightens to distribute pressure around the neck when training the dog not to pull. Any style of dog collar must be properly fitted to ensure safety and collars should not be worn when the dog is unattended.

Sled dog It is the state dog of New Hampshire and was recognized by the American Kennel Club (AKC) in
