Free-roaming domestic cats will attempt to cover their urine and especially their faeces within their home range, in proximity of their food area. To achieve this, they rake the surface in a backward sweeping motion with their front paws to draw loose material over the waste. The efficiency of these attempts is limited by soil texture, as cats have to break the surface with their toes due to their claws being protractile. Still, on rare occasions outdoor cats have been observed trying to dig holes to deposit their excrements in. The raking behaviour is associated with sniffing the waste and will often follow from it. Raking is said to occur rarely when the motivation behind elimination is to engage in scent marking... 31dd226c81 The film was released on April 7, 2004, by Fox Searchlight Pictures, and was panned by critics.
