Traditionally, mortar was made with lime and sand, producing lime putty. In the early 20th century, masons began using Portland cement, a strong, fast drying cement. Masonry cement made its appearance in the 1930s, which is a combination of Portland cement and ground limestone. ff93489f01 The earliest evidence of human activity in the area is from the Paleolithic and, during the Neolithic, there was a causewayed enclosure on Staines Moor. The first bridge across the Thames at Staines is thought to have been built by the Romans and there was a settlement in the area around the modern High Street by the end of the 1st century CE. Throughout the Middle Ages, Staines was primarily an agricultural settlement and was held by Westminster Abbey. The first surviving record of a market is from 1218, but one may have taken place near St Mary's Church in the Anglo-Saxon period. ff93489f01 == Early parish history == ff93489f01 The line was promoted by the Windsor, Staines and South Western Railway (WSSWR). The first section, between Staines and Datchet, opened on 22 August 1848. It was extended to a temporary station at Windsor on 1 December 1849. The permanent terminus, now known as Windsor & Eton Riverside station, was designed by William Tite and opened on 1 May 1851. The London and South Western Railway, which had operated all passenger services from the outset, took over the WSSWR in June 1850. The Southern Railway was responsible for electrifying the line with the 750 V DC third-rail system in 1930. ff93489f01
