Production of the Cherokee ended in February 2023, and restarted in August 2025. Designed by a team led by industrial designer Brooks Stevens, the Wagoneer shared its Jeep SJ chassis with the Jeep Gladiator full-size pickup truck (later renamed the J-Series). Alongside the five-door wagon, the Wagoneer was also marketed as a three-door wagon and a two-door panel truck (effectively giving Jeep its own van). After 1968, the Wagoneer was sold exclusively as the five-door wagon; the three-door wagon was reintroduced as the Jeep Cherokee for 1974. Named after the Cherokee tribe of Native Americans in the United States, Jeep has used the nameplate in some capacity since late 1973 when American Motors Corporation (AMC) introduced the 1974 model year line. == Current models == Jeep's current product range consists solely of sport utility vehicles—both crossovers and fully off-road worthy SUVs and models, including one pickup truck. Previously, Jeep's range included other pick-ups, small vans, as well as a few roadsters. Some of Jeep's vehicles—such as the Grand Cherokee—reach into the luxury SUV segment, a market segment the 1963 Wagoneer is considered to have started. Jeep sold 1.4 million SUVs globally in 2016, up from 500,000 in 2008, two-thirds of which in North America, and was Fiat-Chrysler's best selling brand in the U.S. during the first half of 2017. In the U.S. alone, over 2400 dealerships hold franchise rights to sell Jeep-branded vehicles, and if Jeep were spun off into a separate company, it is estimated to be worth between \$22 and \$33.5 billion—slightly more than all of FCA (US). == Development == Due to customer confusion, the Wagoneer line was absorbed into Grand Wagoneer line in 2026.

Sharing the name of the original, full-size Cherokee SJ model, the 1984 XJ Cherokee was Jeep's first all-new design since the 1963 SJ Wagoneer, as well as the first American off-road vehicle built with fully integrated body-and-frame (unibody) design, and formed the mechanical basis for the Jeep Comanche (MJ) pickup truck (1986–1992). 8d69d8ed6d As AMC began the development of the next Jeep in 1985, management created a business process that is now known as product lifecycle management (PLM). According to François Castaing, vice president for Product Engineering and Development, the smallest U.S. automaker was looking for a way to speed up its product development process to compete better against its larger competitors. It was available in two- or four-door, five-passenger, front-engine, rear- or four-wheel drive configurations

The Grand Cherokee's origins date back to 1983, when American Motors Corporation (AMC) was designing a successor to the Jeep Cherokee. Three outside (non-AMC) designers—Larry Shinoda, Alain Clenet, and Giorgetto Giugiaro—were also under contract with AMC to create and build a clay model of the Cherokee XJ replacement, then known as the "XJC" project. However, the basic design for the Cherokee's replacement was well underway by AMC's in-house designers and the 1989 Jeep Concept 1 show car foretold the basic design.

The XJ is credited for spawning competitors, as other automakers noticed the design cannibalizing sales from regular cars, supplanting the role of the station wagon and transforming the vehicle type "from truck to limousine in the eyes of countless suburban owners," though GM had also launched road-biased, RWD and 4WD compact SUVs, the Chevrolet S-10 Blazer and GMC S-15 Jimmy, one year earlier, initially... 8d69d8ed6d
