Restoration means removing, replacing, or repairing the parts of a vehicle, while preservation means keeping the original components. Though automotive restoration is commonly defined as the reconditioning of a vehicle "from original condition in an effort to return it to like-new or better condition," There are many styles of which a vehicle can be restored, any of which can be performed at the discretion, desire, or taste of a vehicle owner or restorer. Only those industrialists with a particularly modern approach to production could hope to weather the financial crisis with a minimum of damage. Bus preservation groups aim to purchase buses of various eras to restore them to their original operating condition. Buses are often restored to the original authentic livery of their original owner. == History == Design == Power was delivered to the front wheels from a transversely mounted air-cooled twin cylinder two-stroke engine with a horizontal-flow Solex 30 BFRH carburetor. The engine capacity of 293cc provided for a maximum power output of 10 PS (7.4 kW) at 4,000 rpm. The top speed listed was 75 km/h (47 mph). The car was fueled using "regular" grade petrol/gasoline, mixed in the ratio of 25:1 with oil, reflecting the requirements of the "motorbike-style" two-stroke engine.
