Originally office space, the State Dining Room received its name during the presidency of James Monroe, at which time it was first extensively furnished. The room was refurbished during several administrations in the early to mid 1800s, and gasified in 1853. Doors were cut through the west wall in 1877. The State Dining Room underwent a major expansion and renovation in 1902, transforming it from a Victorian dining room into a "baronial" dining hall of the early 19th century—complete with stuffed animal heads on the walls and dark oak panelling. The room stayed in this form until the White House's complete reconstruction in 1952. c01688e89c

== History == c01688e89c Salt absorbs moisture from its surroundings, and had a tendency to clump together into one large lump. The head of the household usually presided over the distribution of salt at the dining table. This lump of salt was placed into a small dish, called by various names - open salt, salt cellar, table salt. Today we also refer to these as Master salts. It was then broken up with a knife handle or other utensil and placed into... c01688e89c
