Coffee production begins when the seeds from coffee cherries, the Coffea plant's fruits, are separated to produce unroasted green coffee beans. The "beans" are roasted and then ground into fine particles. Coffee is brewed from the ground roasted beans, which are typically steeped in hot water before being filtered out. It is usually served hot, although

chilled or iced coffee is common. Coffee can be prepared and presented in a variety of ways, e.g., espresso, French press, caffè latte, or already-brewed canned coffee. Sugar, sugar substitutes, milk, and cream are often added and change the flavor. Unlike bad jokes and other deleted nonsense, however, some of these article names were made for good reasons, on real topics that the writers thought might be useful for Wikipedia. That doesn't always mean that – out of context – the title will be any the less ridiculous-sounding.

Though coffee has become a global commodity, it has a history tied to food traditions around the Red Sea. The earliest reports of coffee drinking pertain to the plant's use among the Sufis of Yemen in southern Arabia in the middle of the 15th century. Up to the end of the 17th century, most of the world's coffee was imported from...
