Production on the first Fusions began on August 1, 2005. The Fusion replaced the Mondeo for the Latin American markets, except in Argentina (where the current European Mondeo is available); in the United States and Canada it superseded the then mid-size Taurus and the compact Contour. The Fusion is positioned between the compact Ford Focus and the full-size Ford Taurus. In the Middle East, this model is sold alongside the Mondeo. Versions sold there are available only with the 2.5-liter engine. Unlike in the United States, Canada, and Latin America, no V6 engine is available in that region. The same is true in South Korea, where only the 2.5-liter engines (including those for the hybrid model) are available as of the 2012 model year. 179eecd580
