Mazin wanted to expand on Bill's story from the video game; he felt it allowed a deeper look at love, happiness, and the passage of time. Filming for the episode took place in the former Beachwood area of High River, Alberta, in September 2021; production designer John Paino and his team constructed the town of Lincoln in around six to twelve weeks. Critics overwhelmingly considered the episode the season's best, with Offerman and Bartlett's performances, Mazin's writing, and Hoar's direction receiving particular praise. It was watched by 6.4 million viewers on its first day. The episode... 20b4a52660

last longer if only heating. Electricity powers the mechanical pump (compressor), the used electric energy providing typically 3 or 4 times more pumped thermal energy than simple resistive Joule heating. The An air source heat pump (ASHP), the most common type of heat pump, can absorb energy (heat) sourced from cold ambient air outside a building, and release the energy at a higher temperature to heat the building, either via hot air or hot water 20b4a52660

Air-to-air heat pumps provide hot or cold air directly to single rooms, but do not usually provide hot water. Air-to-water heat pumps use water pipes and radiators or underfloor heating to heat a whole house and are often also used to provide domestic hot water. 20b4a52660

Evaporative cooler Evaporative cooling differs from other air conditioning systems, which use vapor-compression or absorption refrigeration cycles. Evaporative cooling exploits the fact that water will absorb a relatively large amount of heat in order to evaporate (that is, it has a large enthalpy of vaporization). (also known as evaporative air conditioner, swamp cooler, swamp box, desert cooler and wet air cooler) is a device that cools air through the evaporation An evaporative cooler (also known as evaporative air conditioner, swamp cooler, swamp box, desert cooler and wet air cooler) is a device that cools air through the evaporation of water. The temperature of dry air can be dropped significantly through the phase transition of liquid water to water vapor (evaporation). In extremely dry climates, evaporative cooling of air has the added benefit of raising the humidity and conditioning the air with more moisture for the comfort of building occupants. This natural process can often cool air using much less energy than other forms of refrigeration

Long, Long Time (The Last of Us) The episode's title is taken from the 1970 song by Linda Ronstadt, which plays an important role in Bill and Frank's relationship. "Long, Long Time" is the third episode of the first season of the American post-apocalyptic drama television series The Last of Us. Written by series co-creator Craig Mazin and directed by Peter Hoar, it aired on HBO on January 29, 2023. Written by series "Long, Long Time" is the third episode of the first season of the American post-apocalyptic drama television series The Last of Us. Flashbacks follow Bill over twenty years as he survives in his town and meets his partner Frank (Murray Bartlett). In the episode, Joel (Pedro Pascal) and Ellie (Bella Ramsey) travel to Lincoln, Massachusetts, to find Bill (Nick Offerman) 20b4a52660

Heat pumps use the same vapor-compression refrigeration process and much the same equipment as an air conditioner, but in the opposite direction, or rather source and target can be exchanged, vice versa. With ambient air accessible nearly everywhere, ASHPs are the most common type of heat pump and, usually being small, tend to be used to heat
