English words without vowels A word with ⟨y⟩, but no other vowel letters, may thus be considered vowelless in this context. Outside of abbreviations, there are a handful of words in English that do not have vowels, either English orthography typically represents vowel sounds with the five conventional vowel letters ⟨a, e, i, o, u⟩. ⟨w⟩ can act as a vowel in a narrow subset of loanwords. To a lesser degree, the letter ⟨w⟩ can act as a vowel in a narrow subset of loanwords. The letter ⟨y⟩ is largely recognized as being a vowel in specific contexts, though often disregarded when talking about vowelless words, which typically focus on the absence of the main five

All the words listed are toponyms and describe common feelings and objects for which there is no current English word. Examples are Shoeburyness ("The vague uncomfortable feeling you get when sitting on a seat that is still warm from somebody else's bottom") and Plymouth ("To relate an amusing story to someone without remembering that it was they who told it to you in the first place"). Unsounded yet and full of deep deceit. learned borrowings from classical Greek texts, often via Latin, e.g., 'physics' (< Latin physica < τὰ φυσικά); Numerous models and hypotheses have been proposed in attempt to explain the broad range of symptoms experienced by deep dyslexics, but a definite consensus has yet to be reached. The proposed models and hypotheses have helped in treatment of some patients, but only with certain specific symptoms. Additionally, the recovery seen is not experienced equally in all patients. There are very few lexical words (that is, not counting interjections) without vowel letters. The longest such lexical word is tsksks, pronounced /ˌtɪskˈtɪks/. The mathematical expression nth /ˈɛnθ/, as in delighted to the nth degree, is in fairly common usage. Another mathematical term without vowel letters is ln, the natural logarithm. A more obscure example is rng /ˈrɒŋ/, derived from ring by deleting the letter ⟨i⟩. The sense that sentient creatures have that various objects of our universe are linked is commonly referred to as a person's sense of "meaning". This is the sense of meaning at work when asking a person when they leave a theater, "What did that movie mean to you?" In short, the word "meaning" can sometimes be used to describe the interpretations that people have of the world. Example: "Chunks are pieces of information linked and bound by meaning. (Remembering details vs. getting an overall meaning) links individual memory traces together, to create conceptual chunks." == Meaning as internal interpretation == The deep structure of a linguistic expression is a theoretical construct that seeks to unify several related structures. For example, the sentences "Pat loves Chris" and "Chris is loved by Pat" mean roughly the same thing and use similar words. Some linguists, Chomsky in particular, have tried to account for this similarity by positing that these two sentences are distinct surface forms that derive from a common (or very similar) deep structure. direct borrowings from Modern Greek, e.g., 'ouzo' (ούζο) or 'doula' (δούλα);
