By the late 1920s, the automotive industry's maturation resulted in many smaller automobile manufacturers being acquired or replaced by larger ones. The Chicago Auto Show continued to gain prominence during this era and was often regarded as the "National Auto Show". Samuel Miles retired as the Chicago Auto Show's general manager in 1931 after three decades of service. The project was conceived in 1963; Design Director Roy Axe received his styling brief in 1965; and engineering began in 1966. The Avenger became one of the first automobiles to use computer-aided design (CAD) in the engineering of its unibody, and it was one of the first cars to address growing safety requirements, featuring a rigid passenger compartment with a front crumple zone, strengthened windscreen glass, and heavily padded instrument panel. During the 1970s and 1980s, Chrysler also applied the term Hemi to their Australian-made Hemi-6 Engine, and a 4-cylinder Mitsubishi 2.6 L engine installed in various North American market vehicles.
