On September 9, 2021, it was reported that the United States Environmental Protection Agency had "asked a federal court to allow for Clean Water Act protections for parts of the bay." On January 31, 2023, the EPA effectively vetoed the project, using a rarely invoked power to restrict development to protect watersheds.

The event was originally known as the Bing Crosby National Pro-Amateur, or just the Crosby Clambake. After Crosby's death in 1977, the tournament was hosted by his family for eight years. The Crosby name was dropped after the 1985 event, and AT&T Corporation became the title sponsor in 1986. It is organized by the Monterey Peninsula Foundation.

Towards the end of production, Metro-Goldwyn-Mayer Pictures significantly changed the film, resulting in Bluth and Goldman leaving the film and asking to have their names taken off of it. The two would later start working at Fox Animation Studios.

The name Chesil is derived from chessil (Old English ceosel or cisel), meaning "gravel" or "shingle".

Though some beaches form on inland freshwater locations such as lakes and rivers, most beaches are in coastal areas where wave or current action deposits and reworks sediments. Erosion and changing of beach geologies happens through natural processes, like wave action and extreme weather events. Where wind conditions are correct, beaches can be backed by coastal dunes which offer protection and regeneration for the beach. However, these natural forces have become more extreme due to climate change, permanently altering beaches at very rapid rates. Some estimates describe as much as 50 percent of the earth's sandy beaches disappearing by 2100 due to climate-change driven sea level rise.

Sandy beaches occupy about one third of global coastlines. These beaches...

A beach composed chiefly of surface pebbles is commonly termed a shingle beach. This type of beach has armoring characteristics with respect to wave erosion, as well as ecological niches that provide habitat for animals and plants.
