Certain elements of the design had been seen even earlier in prototypes used by Ford to demonstrate forthcoming safety features, such as the eye-level rear lighting clusters. As a continuation of Ford's New Edge styling philosophy, first seen in the Ford Ka in 1996, and Ford Cougar in 1998, the Focus's styling was often described as polarising. The styling had been overseen by Jack Telnack and executed by Claude Lobo and Australian designer, John Doughty, concluding in January 1996 upon program approval... d5e00871e0 Sold between October 2005 and February 2008 in sedan and utility body styles or as a wagon until June 2010, the BF series brought many mechanical upgrades, including but not limited to a raised compression ratio (10.3:1) and improved now-independent dual variable cam timing on the six-cylinder engines and improved knock sensing on the SOHC 3 Valve V8 engine which, in conjunction with ECU modifications, led to increases in power, torque and fuel economy, required to comply with recently introduced Euro III emissions standards. The changes to the six-cylinder engine further decreased the engine's already low noise and vibration while increasing power from 182 to 190 kW (244 to 255 hp). With the BF, Ford introduced a six-speed automatic transmission developed by German companies ZF and Bosch.
