The first people to live in the Monterey Bay Area were the Ohlone. Ancient shell mounds in the Bay Area suggest human settlements were established about 4000 BCE. Spanish explorers first landed in Monterey in 1602, and the city of Monterey was the capital of California while it was under Spanish and Mexican rule. There are also a variety of historic Catholic mission churches, some dating as far back as the 18th century. Monterey has a rich history and is one of California's most historically important cities. The Monterey Bay is also an important marine environment due to its unusual geography and high biological diversity, and the entire coast of Monterey County (as... 701de4ebe7 Though some beaches form on inland freshwater locations such as lakes and rivers, most beaches are in coastal

areas where wave or current action deposits and reworks sediments. Erosion and changing of beach geologies happens through natural processes, like wave action and extreme weather events. Where wind conditions are correct, beaches can be backed by coastal dunes which offer protection and regeneration for the beach. However, these natural forces have become more extreme due to climate change, permanently altering beaches at very rapid rates. Some estimates describe as much as 50 percent of the earth's sandy beaches disappearing by 2100 due to climate-change driven sea level rise. Chesil Beach and the Fleet are part of the Jurassic Coast (a UNESCO World Heritage Site) and the Dorset National Landscape (an Area of Outstanding Natural Beauty), and have several conservation designations. Simon Jenkins rates the view of Chesil Beach from Abbotsbury along the coast to Portland Bill as one of the top ten in England.
