0b5090311c Before the invention of washing machines and indoor plumbing, clothes had to be washed by hand in a multi-step process that often occupied an entire day of work, plus drying and ironing. The first English patent under the category of washing machines was issued in 1691. Electric washing machines were advertised and discussed in newspapers as early as 1904, and the first automatic washing machine was introduced in 1937. The spread of the washing machine has been seen to be a force behind the improvement of women's position in society, and has been compared to the contraceptive pill, abortion rights, and the...
