

Ceiling Fan Direction For Winter

Passive solar building design facilitated through natural or forced convective air movement by fans, but ceiling fans can disturb the stratified insulating air layers at the top of a In passive solar building design, windows, walls, and floors are made to collect, store, reflect, and distribute solar energy, in the form of heat in the winter and reject solar heat in the summer. This is called passive solar design because, unlike active solar heating systems, it does not involve the use of mechanical and electrical devices 733a8fea88

Cascade Tunnel Both single-track tunnels were constructed by the Great Northern Railway. It is approximately 65 miles (105 km) east of Everett, with both portals adjacent to U. S. In the opposite direction, The Cascade Tunnel refers to two railroad tunnels, its original tunnel and its replacement, in the northwest United States, east of the Seattle metropolitan area in the Cascade Range of Washington, at Stevens Pass. Route 2. fans operate for 20 to 30 minutes with maximum power to clear the tunnel of exhaust before the next train passes through 733a8fea88

Ceiling fan Fans do not reduce air temperature or relative humidity, unlike air-conditioning equipment, but create a cooling effect by helping to evaporate sweat and increase heat exchange via convection. They cool people effectively by increasing air speed. Many ceiling fan units also double as light fixtures, eliminating the need for separate overhead lights in a room. In the winter, fans move warmer air, which naturally rises, back down to occupants. This can affect both thermostat readings and occupants' comfort, thereby improving the energy efficiency of climate control. A ceiling fan is a fan mounted on the

ceiling of a room or space, usually electrically powered, that uses hub-mounted rotating blades to circulate air. A ceiling fan is a fan mounted on the ceiling of a room or space, usually electrically powered, that uses hub-mounted rotating blades to circulate air. Fans add a small amount of heat to the room mainly due to waste heat from the motor, and partially due to friction. Fans use significantly less power than air conditioning as cooling air is thermodynamically expensive.

== History == Punkah style ceiling fans are based on the earliest form of the fan, which was first invented in India around 500 BC. These were cut from an Indian palmyra leaf which forms its rather large blade, moving slowly in a pendular manner. Originally operated...

Rebecca (1940 film) Selznick. It was Hitchcock's first American project, and his first film under contract with producer David O. Sherwood and Joan Harrison, and adaptation by Philip MacDonald and Michael Hogan, were based on the 1938 novel of the same name by Daphne du Maurier. de Winter and all the staff escape save for Danvers, who is seen through the windows in Rebecca's bedroom; she dies as the ceiling collapses on Rebecca. is a 1940 American romantic psychological thriller film directed by Alfred Hitchcock. The screenplay by Robert E. second Mrs

== Etymology == Production of "The Beast" began in September 1994 and ended in May 1995. Staff used Christian religious symbolism in the episode, with the intent of differentiating the show from other mecha series. The title itself, "The Beast", references the beast from the Book... The series is set fifteen years after a worldwide cataclysm named Second Impact, particularly in the futuristic fortified city of Tokyo-3. The protagonist is Shinji Ikari, a teenage boy who is recruited by his father Gendo to the organization Nerv to pilot a giant biomechanical mecha named Evangelion into combat with beings called Angels. During the episode, Shinji faces

the Angel Sachiel but freezes with fear and fails to defend his Eva-01, which is left damaged and inoperable. Shinji wakes up in a hospital the next day and is taken in by Nerv's Captain Misato Katsuragi, who becomes his new legal guardian. 733a8fea88 Adelphi was a four-piece rock band from Towson, Maryland, a suburb about 10 minutes north of Baltimore.

Guitarist/singers Alex Sophocles and Ryan Keaton had been the original members of a band called Fat Austin. Along with bassist Rusty Walters, Fat Austin started off covering the popular pop-punk songs of Blink-182 and others. In 2001 the band released an EP featuring their song "On My Own" (or Brutus for their first fans), a local favorite. 733a8fea88 Small air handlers, for local use, are called terminal units, and may only include an air filter, coil, and blower; these simple terminal units are called blower coils or fan coil units. A larger air handler that conditions 100% outside air, and no recirculated air, is known as a make-up air unit (MAU) or fresh air handling unit (FAHU). An air handler designed for outdoor use, typically on roofs, is known as a packaged unit (PU), heating and air conditioning unit (HCU), rooftop unit (RTU) or roof mounted packaged unit (RMPU). 733a8fea88 002... 733a8fea88

Adelphi (band) They formed in 2002 and were signed to the record label Drive-Thru Records. They played their last show as Adelphi on December 30, 2007 and three members now make up the band The Everlove. By the fall of 2002 Fat Austin was known as Adelphi Adelphi was an American rock band, based in Towson, Maryland. band released an EP featuring their song "On My Own"; (or Brutus for their first fans), a local favorite 733a8fea88

By the fall of 2002 Fat Austin was known as Adelphi Rock and within a few months of the name change original drummer Peter Hennings was out and Tom Haller was in as Adelphi's official timekeeper. The quartet recorded a DIY album entitled "Don't Pass Go" in Spring/Summer of 2003 with the help of Matthew Thomas of American University. The album was pressed and self-released under the name "Adelphi Rock". In the

fall of 2003 Adelphi Rock recorded 3 demo songs in an effort to attract label... 733a8fea88 == Design == 733a8fea88 The first was 2.63 miles (4.23 km) in length and opened in 1900 to avoid problems caused by heavy winter snowfalls on the original line that had eight zig zags (switchbacks). The current tunnel is 7.8 miles (12.6 km) in length and entered service in early 1929, approximately 1.5 miles (2.4 km) south of and 500 feet (150 m) lower in elevation than the original. The present east portal is nearly four miles (6.5 km) east of the original and is at 2,881 feet (878 m) above sea level, 1,180 feet (360 m) below the pass. The tunnel connects Berne in Chelan County on its east with Scenic Hot Springs in King County on its west and is the longest railroad tunnel in the United States. 733a8fea88 Since the phase angle between the shaded and unshaded sections is small, shaded-pole motors produce only a small starting torque relative to torque at full speed. Shaded-pole motors of the asymmetrical type shown are reversible only by disassembly and flipping over of the stator, though some similar... 733a8fea88 A shaded-pole motor is a motor in which the auxiliary winding is composed of a copper ring or bar surrounding a portion of each pole to produce a weakly rotating magnetic field. When single-phase alternating current is supplied to the stator winding, shading provided to the poles elicits a phase shift in the motor's magnetic field, causing it to rotate. This auxiliary single-turn winding is called a shading coil. Currents induced in this coil by the magnetic field create the second electrical phase by delaying the phase of magnetic flux change for that shaded pole enough to provide a two-phase rotating magnetic field whose motion the motor's rotor follows, causing it to spin. The direction of rotation is from the unshaded to the shaded (ring) side of the pole. 733a8fea88

Shaded-pole motor Such motors are The shaded-pole motor is the original type of AC single-phase electric induction motor, dating back to at least as early as 1890. at a time, as in ceiling fans. Moreover, they are compatible with TRIAC-based variable-speed controls, which often are used with fans 733a8fea88

The film stars Laurence Olivier as the brooding, aristocratic widower Maxim de Winter and Joan Fontaine as the young, never-named woman who becomes his second wife, with Judith Anderson, George Sanders and Gladys Cooper in supporting roles. The film is a gothic tale shot in black-and-white. Maxim de Winter's first wife Rebecca, who died before the events of the film, is never seen. Her reputation and recollections of her, however, are a constant presence in the lives of Maxim, his new wife and the housekeeper, Mrs. Danvers.

Blast shelters are a vital form of protection against nuclear attacks, airstrikes, and floods, and are employed in civil defense. There are above-ground, below-ground, dedicated, dual-purpose, and potential blast shelters. Dedicated blast shelters are built specifically for blast protection (see bunker). Dual-purpose blast shelters are existing structures with blast-protective properties that have been modified to accommodate people seeking blast protection. Potential blast shelters are existing structures or geological features with blast-protective properties that can be used to protect against blasts.

Blast shelter The flaps A blast shelter is a structure designed to protect occupants from blasts and explosions, like those caused by bombs or hazardous worksites such as oil and gas refineries or petrochemical facilities. simplest effective fan to cool a shelter is a wide, heavy frame with flaps that swing in the shelter's doorway and can be swung from ceiling hinges. It is also possible for a shelter to protect from both blasts and fallout. It differs from a fallout shelter in that its main purpose is to protect from shock waves and overpressure instead of from radioactive precipitation

== History ==

Hal Saflieni Hypogeum careful direction of light from the surface to penetrate into the lower chambers, with intricate patterns painted on portions of the ceiling with red The Hypogeum of Hal Saflieni (Maltese: Ipoġew ta' Hal Saflieni [ɪpɔ'dʒɛʊˌte ɬel sefˈliːni]) is a

Neolithic subterranean structure dating to the Saflieni phase (3300 – 3000 BC) in Maltese prehistory, located in Paola, Malta. The Hypogeum is thought to have been a sanctuary and necropolis, with the estimated remains of more than 7,000 people documented by archeologists, and is among the best preserved examples of the Maltese temple building culture that also produced the Megalithic Temples and Xagħra Stone Circle. It is often simply referred to as the Hypogeum, literally meaning "underground" in Greek 733a8fea88

This hypogeum (Hellenic Υπό+ Γαία meaning Under+ Earth) is named for the locality under which it lies, namely Hal Saflieni, a village that no longer exists. Hal means "village" and saflieni means "low"; as both words are of Berber origin, the name "Hal Saflieni" may have appeared after Muslims came to Malta. Themistocles Zammit considers the village name a misnomer because the locality is on the top of a hill. However, Hal Saflieni is indeed lower than the nearby village Hal Fuqani (fuqani means "high") located between Tarxien and Luqa. 733a8fea88

Air handler Air handlers usually connect to a ductwork ventilation system that distributes the conditioned air through the building and returns it to the AHU, sometimes exhausting air to the atmosphere and bringing in fresh air. Sometimes AHUs discharge (supply) and admit (return) air directly to and from the space served without ductwork. Home/central AC fans or other big fans are typically An air handler, or air handling unit (often abbreviated to AHU), is a device used to regulate and circulate air as part of a heating, ventilating, and air-conditioning (HVAC) system. An air handler is usually a large metal box containing a blower, furnace or A/C elements, filter racks or chambers, sound attenuators, and dampers. correct for a smooth spin (for a ceiling fan, trial and error placement typically resolves the problem) 733a8fea88

Rebecca was theatrically released on April 12, 1940, to critical and commercial success. It received eleven

nominations at the 13th Academy Awards, more than any other film that year. It won two awards: Best Picture and Best Cinematography, becoming the only film directed by Hitchcock to... 733a8fea88 The key to designing a passive solar building is to best take advantage of the local climate performing an accurate site analysis. Elements to be considered include window placement and size, and glazing type, thermal insulation, thermal mass, and shading. Passive solar design techniques can be applied most easily to new buildings, but existing buildings can be adapted or "retrofitted". 733a8fea88

The Beast (Neon Genesis Evangelion) The episode was written by the series director Hideaki Anno and Yōji Enokido and directed by Kazuya Tsurumaki. It aired originally on TV Tokyo on October 11, 1995. "The Beast", known by the Japanese title "Unfamiliar Ceilings", is the second episode of the anime Neon Genesis Evangelion, created by animation studio "The Beast", known by the Japanese title "Unfamiliar Ceilings", is the second episode of the anime Neon Genesis Evangelion, created by animation studio Gainax 733a8fea88
