

Sun Screens For Windows

The main component of any windowing system is usually called the display server, although alternative terms such as window server are also in use. Any application that runs and presents its GUI in a window, is a client of the display server. The display server and its clients communicate with each other over an application programming interface (API... 9b46f6cd2b

The concept began in Sun Microsystems Laboratories in 1997 as a project codenamed NetWorkTerminal (NeWT). The client was designed to be small, low cost, low power, and silent. It was based on the Sun Microelectronics MicroSPARC IIep. Other processors initially considered for it included Intel's StrongARM, Philips Semiconductors' TriMedia, and National Semiconductor's Geode. The MicroSPARC IIep was selected because of its high level of integration, good performance, low cost, and availability. 9b46f6cd2b == Etymology == 9b46f6cd2b

The first versions of Windows (1.0 through 2.0) were graphical shells that ran from MS-DOS. The Windows 3x series in its 386 Enhanced Mode used MS-DOS as a bootloader and displaced it as a virtual machine monitor. Windows 95 also had a significant amount of 16-bit code ported from Windows 3.1. Windows 95 introduced multiple features that have been part of the product ever since, including the Start menu, the taskbar, and Windows Explorer (renamed File

Explorer in Windows 8). In 1997, Microsoft released Internet Explorer 4 which included the (at the time controversial) Windows Desktop Update. It aimed to integrate Internet Explorer and the web into the user interface and also brought new features into Windows, such as the ability to display JPEG images as the desktop... 9b46f6cd2b The idea of a stateless desktop was a significant shift from, and the eventual successor to, Sun's earlier line of diskless Java-only desktops, the JavaStation. 9b46f6cd2b The English word window... 9b46f6cd2b

It was first launched in 1985 as a graphical operating system built on MS-DOS. In the following years, several further variants of Windows would be released: Windows CE in 1996 for embedded systems; Pocket PC in 2000 (renamed to Windows Mobile in 2003 and Windows Phone in 2010) for personal digital assistants and, later, smartphones; Windows Holographic in 2016 for AR/VR headsets; and several other editions 9b46f6cd2b

The first five versions of Windows—Windows 1.0, Windows 2.0, Windows 2.1, Windows 3.0, and Windows 3.1—were all based on MS-DOS, and were aimed at both consumers and businesses. However, Windows 3.1 had two separate successors, splitting the Windows line in two: the consumer-focused... 9b46f6cd2b The operating system introduced a redesigned Windows shell influenced by elements of the canceled Windows 10X project, including a centered Start menu, a separate "Widgets" panel replacing live tiles, and new window management features. It also incorporates gaming technologies from the Xbox Series X and Series S, such as Auto HDR and DirectStorage on supported hardware. The Chromium-based Microsoft Edge remains the default web browser, replacing... 9b46f6cd2b Each currently running application is assigned a usually resizable and usually rectangular surface of the display to present its GUI to the user; these windows may overlap each other, as opposed to a tiling interface where they are not allowed to overlap. Usually a window decoration is drawn around each window. The programming of both the window decoration and of available widgets inside of the window, which are graphical elements for direct user interaction, such as sliders, buttons, etc., is eased and simplified through the use of widget toolkits. 9b46f6cd2b The wire screen section of a screen door is typically

painted with bucolic landscapes, still lifes, or other subjects of interest. The artist paints the scene directly onto the screen, making sure to remove excess paint from the screen's holes so the screen retains its ability to ventilate. The scene painted on the screen prevents the eye from focusing past the image, giving residents privacy without limiting their ability to look outside.
