Why are some journal articles included in References and others in Works cited? Compare Whistler (1922) and Ticehurst (1922). 8374f1ab05 As this relatively large number of young people entered their teens and young adulthood, they, and those around them, created a very specific rhetoric around their cohort, and social movements brought about by their size in numbers. This impacted society's perception of the boomers and further popularized

generational thinking, which was a relatively new phenomenon at the time. In many countries, this... 8374f1ab05 Nominator(s): —innotata 07:07, 13 August 2014 (UTC)reply 8374f1ab05 When using the journal template the output generated by series= keyword is confusing, consider putting "series=11th series" etc Aa77zz (talk) 12:06, 14 August 2014 (UTC)reply 8374f1ab05 "Blyth's description was described" is not ideal, -> "Blyth's description was contained in"? Baby boomers The generation is often defined as people born from 1946 to 1964. These years span the mid-20th-century baby boom that followed the end of World War II. The dates, the demographic context, and the cultural identifiers may vary by country. Most boomers are the parents of Generation X, Millennials and older Generation Z. previously deemed luxurious, such as the laundry machine, the dishwasher, the refrigerator, and the telephone, entered mass

production for the average consumer Baby boomers, often shortened to boomers, are the demographic cohort preceded by the Silent Generation and followed by Generation X

My personal preference (which you can obviously ignore) is to include the volume number of a book with the title - as with Summers-Smith (2009), rather than using the volume= keyword which gives an ugly bold number. Aa77zz (talk) 12:06, 14 Au... 8374f1ab05 A mix of water and dishwasher detergent is pumped to one or more rotating sprayers, cleaning the dishes with the cleaning mixture. The mixture is recirculated to save water and energy. Often there is a pre-rinse, which may or may not include detergent, and the water is then drained. This is followed by the main wash with fresh water and detergent. Once the wash is finished, the water is drained; more hot water enters the tub by means of an electromechanical solenoid valve, and the rinse cycle(s) begin. After the rinse process finishes, the water is drained again and the dishes are dried using one of several drying methods. Typically a rinse-aid, a chemical to reduce the surface tension of the water, is used to reduce water spots from hard water or other reasons. 8374f1ab05 Linked an article. With the invention of the rectifier tube, which made it practical to power radios by electrical outlets, in 1928, Philco entered the radio business. They followed other radio makers such as RCA, Atwater-Kent, Zenith Electronics, Freshman Masterpiece, FADA Radio (Frank A. D'Andrea Radio), and AH Grebe into the battery-powered radio business. By the end of 1930, they were selling more radios than any other

maker, a position they held for more than 20 years. 8374f1ab05 In the West, boomers' childhoods in the 1950s and 1960s had significant reforms in education, both as part of the ideological confrontation that was the Cold War, and as a continuation of the interwar period. Theirs was a time of economic prosperity and rapid technological progress, and many grew up expecting the world to improve with time. 8374f1ab05 Description 8374f1ab05
