The drum of the Hippo water roller is made from UV-stabilized linear low-density polyethylene and is designed to cope with the rough surfaces found in rural areas. The drum's volume is 90 litres (24 US gal). It has a large, 135-millimetre (5.3 in) diameter opening for easy filling and cleaning. The size of the opening was originally determined by the availability of a large enough lid. The lid then on its part determined the roll radius of the roller, since enough clearance was required with the lid fitted to keep the latter clear from the ground and any obstacles which might damage it. The lid was eventually further recessed on later models to...

The S-Series debuted for the 1991 model year with the Sport Coupe (SC) and Sedan Level (SL) models. The SC was only available with the DOHC (Dual Overhead Cam) engine whereas the SLs had an option for the SOHC (Single Overhead Cam) engine (SL1) or the DOHC (SL2). Lumber may be supplied either rough-sawn, or surfaced on one or more of its faces. Rough lumber is the raw material for furniture-making, and manufacture of other items requiring cutting and shaping. It is available in many species, including hardwoods and softwoods, such as white pine and red pine, because of their low cost. The song was written by Roger Waters in mid-1967, who came up with a riff over which he could sing a melody within his vocal range. One of the group's managers, Peter Jenner said it was the first song that Waters wrote that he thought was a similar quality to those by Syd Barrett.

Common variances from standard records include pigmented vinyl, disks filled

with a substance such as oil, or unusually shaped records. These can alter the appearance and sometimes playability of a record. This is done for a variety of reasons, including as a method of promotion for limited-release albums. b9f15743f7

Originally developed as a compact off-road vehicle using its own chassis, the Bronco initially competed against the Jeep CJ-5 and International Scout. For 1978, Ford enlarged the Bronco, making it a short-wheelbase version of the F-Series pickup truck; the full-size Bronco now competed against the Chevrolet K5 Blazer and Dodge Ramcharger. b9f15743f7 == History == b9f15743f7

Lumber Lumber has many uses beyond home building. In some parts of the world, including the United States and Canada, the term timber refers specifically to unprocessed wood fiber, such as cut logs or standing trees that have yet to be cut. Lumber is mainly used for construction framing, as well as finishing (floors, wall panels, window frames). Lumber may be supplied either rough-sawn, or surfaced on one or more of its faces. Rough lumber is the raw material for furniture-making, and manufacture Lumber, also called timber or fine wood in the United Kingdom, Australia, and New Zealand, is wood that has been processed into uniform and useful sizes (dimensional lumber), including beams and planks or boards

The Firebird was the base model, equivalent to the Camaro Sport Coupe; the Firebird S/E was the luxury version; and the Trans Am, the high-performance version. For 1982, the new Firebird had been completely restyled, with the windshield slope set at a dramatic, more aerodynamic 62 degrees, (about 3 degrees less steep than anything GM had ever tried before), flush-mounted side glass, and for the first time, a large, glass-dominated rear hatchback. Electronically controlled retractable headlamps, and a rounded hoodline and front fenders were the primary characteristics that distinguished the Firebird from its Camaro sibling and its previous Firebird incarnations. The Firebird would retain hidden headlamps until the end of all production... b9f15743f7
