The primary advantage of RegExTypoFix over other possible spellchecking engines and approaches is accuracy and the return of only one possible replacement. The rules below are developed to give as few false positives as possible. Errors should be encountered only in extremely rare usages or when parsing other languages (though even then if there are too many false positives the expression will be modified). On everyday English, accuracy should hit 100%. b7d71850a7 22:58, 30 Sep 2004 Evercat deleted "Marius olsen" (content was: 'A Norwegian boy') b7d71850a7
