He continued to work as a miner, becoming involved with the local labour movement as a union official. In October, the expedition reached New Zealand; Cook was only the second European to visit there, following the first voyage of Abel Tasman 127 years earlier. Cook and his crew spent the following six months charting the New Zealand coast, before resuming their voyage westward across open sea. In April 1770 they became the first known Europeans to reach the east... Cook was born in Point Pleasant, New Jersey and grew up in a house on Bay Avenue near the border with Bay Head. In conventional reservoirs, the naturally occurring hydrocarbons, such as crude oil (petroleum) or natural gas, are trapped by overlying rock formations with lower permeability, while in unconventional reservoirs the rocks have high porosity and low permeability, which keeps the hydrocarbons trapped in place, therefore not requiring a cap rock.
