The default distribution of VLC includes many free decoding and encoding libraries, avoiding the need for finding/calibrating proprietary plugins. The libavcodec library from the FFmpeg project provides many of VLC's codecs, but the player mainly uses its own muxers and demuxers. It also has its own protocol implementations. It also gained distinction as the first player to support playback of encrypted DVDs on Linux and macOS by using the libdvdcss DVD decryption library; however, this library is legally controversial and is not included in many software repositories of Linux... e32fcd5caa

== Plot == e32fcd5caa Orestis Kalligaridis (Nikos Stavridis) is extremely and obsessively jealous of his young and beautiful wife Rena (Maro Kontou) who, although distraught and offended by his inquisitive attitude, remains faithful to him nonetheless. Orestis spends much of the day outside the house tending to his various business interests while Rena stays at home practically alone, save for her housemaid Toula (Martha Vourtsi) and her friend and neighbor Elli (Popi Lazou) whom she socializes with. Yet, the fact that Rena leads such a leisurely routine in an affluent suburb of Athens with numerous potential suitors in the vicinity further stokes Orestis' insecurity and compounds his fears of falling prey to a conspiracy. The frequent presence just outside the house gates of a moustached man, a chauffeur

named Leandros (Mimis Fotopoulos) who acts suspiciously and seems particularly interested in what goes... e32fcd5caa In color photography, electronic sensors or light-sensitive chemicals record color information at the time of exposure. This is usually done by analyzing the spectrum of colors into three channels of information, one dominated by red, another by green and the third by blue, in imitation of the way the normal human eye senses color. The recorded information is then used to reproduce the original colors by mixing various proportions of red, green and blue light (RGB color, used by video displays, digital projectors and some historical photographic processes), or by using dyes or pigments to remove various proportions of the red, green and blue which are present in white light (CMY color, used for prints on paper and transparencies on film). e32fcd5caa Most of the show was based at Glasgow Science Centre, with a little part taking place outdoors. At the start of the show, Nina conducts experiments in front of an unseen audience of children. At one point of the show, Nina is 'contacted' by (usually two or three, but rarely

four) children, who appear on a computer screen asking a science-related question (e.g., 'What makes rainbows appear and disappear?') Nina then chooses one (or more) of the five Neurons inside her brain based upon which of the senses is most appropriate to answer the question. Once the Neuron has been selected by Nina, the children (called... e32fcd5caa
