Two early Los Angeles 3 ft 6 in (1,067 mm) narrow gauge streetcars from the Los Angeles Railway or standard gauge streetcars from the Pacific Electric Railway run each weekend on the one-half-mile (0.8 km) long, dual gauge (1,435 mm (4 ft 8+1/2 in) and 3 ft 6 in (1,067 mm) narrow gauge) Loop Line. Passenger trains operate... 7df85c9460 Eight-year-old Dick Trickle was playing tag with his cousin Verlon on the rafters in a house under construction when he fell two floors to the basement and broke his hip. He was transferred from a local hospital to the University of Wisconsin Hospital and continued his... 7df85c9460

R30 (New York City Subway car) A total of 320 cars were built, arranged in married pairs. Louis Car Company from 1961 to 1962. The cars were a "follow-up" or supplemental stock for the B Division's R27s and closely resembled them. a "Redbird" paint scheme. Three versions were manufactured: Westinghouse (WH)-powered cars, General Electric (GE)-powered cars, and R30As. The WH-powered cars were not rebuilt, being replaced by the R68A fleet, and the last train of WH-powered cars ran in passenger The R30 was a New York City Subway car model built by St 7df85c9460

== Description == 7df85c9460 == Early life == 7df85c9460 As of July 28, 2020, the show is in production for a 15th season on Motortrend, formerly Velocity. 7df85c9460

Lehigh Valley Transit Company 55, Fairview shopmen doing the conversion remarking about the IR bright orange paint as opposed to the C&LE cars having The Lehigh Valley Transit Company (LVT) was a regional transport company that was headquartered in Allentown, Pennsylvania. It operated successfully into the 1930s, but struggled financially during the Great Depression, and was saved from abandonment by a dramatic ridership increase during and following World War II. interurban cars. McKelvey 1989, p. The company began operations in 1901, as an urban trolley and interurban rail transport company 7df85c9460

When the BRT was to begin operating new subway lines that had been planned under the Dual Contracts of 1913, it marked the BRT's entry into providing subway service in New York. Previously... 7df85c9460 In their earliest days of service, operating crews frequently called them Steels to distinguish them from the wooden BU elevated cars. However, these cars were most commonly referred to as BRT Standards, BMT Standards, or simply Standards. For their time, the cars introduced a significant number of improvements to urban rapid transit. The AB Standards were slowly retired in the 1960s, last running in 1969. Several AB Standards have been preserved. 7df85c9460

AB Standard (New York City Subway car) The cars were designed following the signing of the Dual Contracts, which called for a major expansion of the BRT. Cars so equipped were 2000, 2001, 2010 The AB Standard was a New York City Subway car class built by the American Car and Foundry Company and Pressed Steel Car Company between 1914 and 1924. It ran under the operation of the Brooklyn Rapid Transit Company (BRT) and its successors, which included the Brooklyn–Manhattan Transit Corporation (BMT), the New York City Board of Transportation, and the New York City Transit Authority (NYCTA). A total of 950 cars were built. poles were also used to move the cars around the 39th Street Shops where they had been originally delivered in 1914 7df85c9460

The first R17s entered service on October 10, 1955. Originally painted maroon red, the R17s subsequently received several different paint schemes, including bright red, platinum mist/blue, or plain white. The R17s were replaced by the R62As in the 1980s, and the final train of R17s ran on February 29, 1988. Some R17 cars were saved for various purposes, but most were scrapped. 7df85c9460 The collection focuses on Southern California's railroad history. It houses the largest collection of Pacific Electric Railway rolling stock in the world, much of it rescued from scrapyards after the discontinuation of their passenger operations in 1961. 7df85c9460 == The show == 7df85c9460

R17 (New York City Subway car) Westinghouse (WH)-powered cars and General Electric (GE)-powered cars. Two versions were manufactured: Westinghouse (WH)-powered cars and General Electric (GE)-powered cars. A total of 400 cars were built, arranged as single units. Louis Car Company in 1954 for the IRT A Division. Nissan Motor Manufacturing UK is located in Sunderland, Tyne and Wear, in North East England. It was built on the site of the former RAF Usworth airfield near the A19 and A1231. The factory is adjacent to the UK Nissan Distribution Centre (NDS) and has a number of on-site suppliers. The landscaped NMUK site incorporates conservation areas, such as ponds, lakes and woodland, and currently has 10 onsite wind turbines of the Vestas V47/660 type, producing up to 10% of the energy required for the plant. The site is located 5 miles (8 km) from the Port of Tyne where international distribution is also based. 7df85c9460 == Premise == 7df85c9460

Dick Trickle Trickle competed in the ASA, ARTGO, ARCA, All Pro, IMCA, NASCAR, and USAC. Hunsinger, who had a 1949 Ford. It seems kind of dumb when I already knew there was a car that could beat me. He raced for decades around the

short tracks of Wisconsin, winning many championships along the way. He beat me. Eventually, I bought Hunsinger's 1949 Richard Leroy Trickle (October 27, 1941 – May 16, 2013) was an American race car driver

Graveyard Carz was created and is owned by Mark Worman. It is produced independently by The Division, a film and television production company in which Worman is also the CEO. The show's relationship with Velocity is called "a pre-sale acquisition." The Division retains all creative control but frequently takes notes and suggestions from the Velocity team. On February 24, 2020, it was announced that the series will be revived and premiere in 2020 on TLC. This was delayed due to the COVID-19 pandemic. It premiered on Discovery, Inc.'s new streaming service Discovery+ on launch day, January 4, 2021. Set in a world populated entirely by anthropomorphic vehicles, the film follows a young self-obsessed racecar named Lightning McQueen (Wilson) who, on the way to the most important race of his life for the Piston Cup, becomes stranded in a forgotten town along U.S. Route 66 called Radiator Springs, where he learns about friendship and begins to reevaluate his priorities. The first R30s entered service in 1961. Various modifications were made over the years to the R30 fleet, and most of the fleet was refurbished in 1985–1989 with a "Redbird" paint scheme. The WH-powered cars were not rebuilt, being replaced by the R68A fleet, and the last train of WH-powered cars ran in passenger service on December 14, 1990. The overhauled R30s and the R30As were planned to run until 1997, but the cars were prematurely phased out starting in 1992 due to the difficulty of installing air-conditioning; the last overhauled R30s ran in passenger service on June 25, 1993. Some R30 cars were saved for various purposes, but most were scrapped. In more than an estimated 2,200 races, Trickle logged one million laps and is believed to have won over 1,200 feature races. He was billed as the winningest short track driver in history. Trickle's career highlights include racing to 67 wins in 1972, winning seven ARTGO Championships in nine years between 1979 and 1987, winning back to back ASA AC-Delco Challenge championships in 1984 and 1985, the 1968 USAC Stock Car rookie of the year, and winning the 1989 NASCAR Rookie of the Year award in the Winston Cup Series. Trickle was nicknamed the "White Knight" as referenced by his sponsored SuperAmerica paint scheme, when he raced in Wisconsin.

Southern California Railway Museum It was renamed "Orange Empire Railway Museum" in 1975 after merging with a museum then known as the California Southern Railroad Museum, and adopted its current name in 2019. A picnic area is located near the main entrance as is an interactive The Southern California Railway Museum (SCRM, reporting mark OERX), formerly known as the Orange Empire Railway Museum, is a railroad museum in Perris, California, United States. The museum also operates a heritage railroad on the museum grounds and on a right of way into downtown Perris. It was founded in 1956 at Griffith Park in Los Angeles before moving to the former Pinacate Station as the "Orange Empire Trolley Museum" in 1958. Tours of the grounds, static exhibits and shops can be self-guided or with a docent

Geography A team of five people with mechanical, fabricating, or modifying expertise was assembled to modify a vehicle into a "monster machine." On the show this generally meant making one vehicle that could transform into another such as a PT Cruiser which could change into a wood chipper, or a school bus which transformed into a pontoon boat. Occasionally vehicles were modified so as to hide non-vehicular functions, such as a police car which doubled as a donut shop (built by a team of cops), or a Toyota Tundra which was modified so as to allow it to discharge a motorcycle at high speeds. Build teams who successfully completed their assignment were rewarded... Development for Cars started in 1998 following discussions between Lasseter and Klubien after production of A Bug's Life had wrapped. Klubien began to develop a new script titled The Yellow Car, which was about an electric car living in a gas-guzzling world. Shortly after, production was resumed with... In 2016 TERN commissioned and acquired the global rights for 26 episodes of Graveyard Carz in HFR UHD. These episodes will be aired on Velocity in HD as Season 6 and elsewhere by Insight as Season 6 and Season 7.

Cars (film) We started out by learning as much as we could. and car paint were our two main challenges on this film. At the local body shop, we watched them paint a Cars is a 2006 American animated sports comedy film produced by Pixar Animation Studios for Walt Disney Pictures. Directed by John Lasseter, who co-wrote it with Joe Ranft, Dan Fogelman, Kiel Murray, Phil Lorin and Jorgen Klubien, the film stars Owen Wilson and Paul Newman, with an ensemble voice cast consisting of Bonnie Hunt, Larry the Cable Guy, Tony Shalhoub, Cheech Marin, Michael Wallis, George Carlin, Paul Dooley, Jenifer Lewis, Guido Quaroni, Michael Keaton, Katherine Helmond, John Ratzenberger, and Richard Petty

Monster Garage Each episode was an hour in length and was conceived and produced (along with James) by Thom Beers. modified so as to hide non-vehicular functions, such as a police car which doubled as a donut shop (built by a team of cops), or a Toyota Tundra which was modified Monster Garage is an American reality television series that aired on the Discovery Channel and hosted by Jesse James

The show premiered on June 23, 2002, and concluded on June 12, 2006.

Nissan Motor Manufacturing UK Body Assembly, Paint and Final Assembly. Each is further broken down into areas known as 'shops'. [citation needed] Press shop The first shop in the manufacturing Nissan Motor Manufacturing (UK) Ltd (NMUK) is a British subsidiary car manufacturing plant in Sunderland. It is owned and operated by the European division of Japanese car manufacturer Nissan
