

Sage How To Plant

Salvia dorrii the purple sage, Dorris sage, fleshy sage, mint sage, or tobacco sage, is a perennial spreading shrub in the family Lamiaceae. It is native to mountain areas in the western United States, particularly northwestern Arizona, New Mexico, and West Texas, found mainly in the Great Basin and southward to the Mojave Desert, growing in dry, well draining soils

In 1994, the company changed its name to SAGE Electrochromics, Inc.

Leland Sage Born in Magnolia, Arkansas, to Jesse A. He was deeply interested in Iowa history, and wrote two books on it, both of which won national recognition from the American Association for State and Local History. 1983, Sage was awarded the honorary degree of Doctor of Humane Letters. In 1983, Sage was awarded the honorary degree of Doctor of Humane Letters. and Mary C. (Livingston) Sage, Sage earned Leland Livingston Sage (April 23, 1899 – February 16, 1989) was an American professor emeritus of history at the University of Northern Iowa

It moved to Faribault, Minnesota, in 1998, where over the next five years it refined the production process and testing of its first commercial...

Salvia stenophylla Its specific epithet, *stenophylla*, refers to the narrow leaves. It has been used traditionally as a disinfectant by burning it in huts after sickness, and it is also mixed with tobacco for smoking. It grows on grassy or stony slopes, and in open countryside or among shrubs. *Salvia stenophylla* (Blue Mountain sage) is a perennial shrub native to a wide area of Southern Africa: South Africa (the Cape Provinces, Lesotho, KwaZulu-Natal *Salvia stenophylla* (Blue Mountain sage) is a perennial shrub native to a wide area of Southern Africa: South Africa (the Cape Provinces, Lesotho, KwaZulu-Natal, the Free State and the Northern Provinces), Botswana and Namibia

SAGE Electrochromics In May 2012 Saint-Gobain announced they had acquired 100% of SAGE. large-scale electrochromic glass plant in Faribault, Minnesota. , a wholly owned subsidiary of Saint-Gobain, is a specialized window glass developer based in Faribault, Minnesota. The company became a wholly SAGE Electrochromics, Inc 1270d3563d

== Characteristics == 1270d3563d Plant community 1270d3563d

Coastal sage scrub It is within the California chaparral and woodlands ecoregion, of the Mediterranean forests, woodlands, and scrub biome. Coastal sage scrub (CSS), also called coastal scrub or soft chaparral, is a low scrubland plant community of the California coastal sage and chaparral Coastal sage scrub (CSS), also called coastal scrub or soft chaparral, is a low scrubland plant community of the California coastal sage and chaparral subecoregion, found in coastal California and northwestern coastal Baja California 1270d3563d

The greater sage-grouse is a permanent resident in its breeding grounds but may move short distances to lower elevations during winter. It makes use of a complex lek system in mating and nests on the ground under sagebrush or grass patches. It forages on the ground, mainly eating sagebrush but also other plants and insects. Greater sage-grouse do not have a muscular crop and are not able to digest hard seeds like other grouse. 1270d3563d == Description == 1270d3563d

Salvia Salvia (/ˈsælvɪə/) is the largest genus of plants in the sage family Lamiaceae, with just under 1,000 species of shrubs, herbaceous perennials, and annuals 1270d3563d

Salvia stenophylla is a many-branched and upright shrub that reaches up to 2 feet (0.61 m) tall and wide in the wild, less in cultivation. The stems are square and lightly covered with hairs. The leaves are long and narrow with deep lobes. They have a strong fragrance and are rough to the touch. The sparsely spaced leaves are pinnatid, growing up to 2 inches (5.1 cm) long and 0.5 inches (1.3 cm) wide, with ten pairs of narrow segments that have glands. These glands give off a wood-like aroma when brushed. The stem and leaves contain the essential oils. The tiny pale blue flowers appear during the summer months. They grow in whorls of six to eight, and are held in a calyx that... 1270d3563d Born in Magnolia, Arkansas, to Jesse A. and Mary C. (Livingston) Sage, Sage earned his Bachelor of Arts degree in history at Vanderbilt University in 1922, and was awarded the Master of Arts (1928) and Doctor of Philosophy

degrees (1932), both at the University of Illinois at Urbana-Champaign. 1270d3563d The Record... 1270d3563d

Greater sage-grouse Its range is sagebrush country in the western United States and southern Alberta and Saskatchewan, Canada. Greater sage-grouse do not have a muscular crop and are not able to digest hard seeds like other grouse The greater sage-grouse (*Centrocercus urophasianus*), also known as the sagehen, is the largest grouse in North America. It was known as simply the sage grouse until the Gunnison sage-grouse was recognized as a separate species in 2000. eating sagebrush but also other plants and insects. The Mono Basin population of sage grouse may also be distinct 1270d3563d

The company was founded in 1989 by former CEO John Van Dine as Sun Active Glass Electrochromics, Inc. (SAGE) in a Valley Cottage, New York, laboratory. In 1992 the company moved to Rutgers University's Department of Ceramic Science and Engineering for R&D collaboration with Rutgers scientists. 1270d3563d

Record Plant In February 1976, for the The Record Plant was a recording studio established in New York City in 1968 and last operating in Los Angeles, California. Known for innovations in the recording artists' workspace, it produced highly influential albums, including the New York Dolls' New York Dolls, Bruce Springsteen's Born to Run, Blondie's Parallel Lines, Metallica's Load and Reload, the Eagles' Hotel California, Fleetwood Mac's Rumours, Cyndi Lauper's She's So Unusual, Hanoi Rocks' Two Steps from the Move, Eminem's The Marshall Mathers LP, Guns N' Roses' Appetite for Destruction, and Kanye West's The College Dropout. recordings were made by Record Plant crews and gear for Dan Fogelberg, Sly Stone, Joe Walsh and the New Riders of the Purple Sage. More recent albums with songs recorded at Record Plant include Lady Gaga's ARTPOP, D'Angelo's Black Messiah, Justin Bieber's Purpose, Beyoncé's Lemonade, and Ariana Grande's Thank U, Next 1270d3563d

== Early life == 1270d3563d It is native to the steppes and hills of southwestern and central Asia. Successful over a wide range of climate and soil conditions, it has since become popular and widely planted. Several cultivars have been developed, differing primarily in leaf shape and overall height; 'Blue Spire' is the most common. This variation has been widely used in gardens and landscaping. *S. yangii* was the Perennial Plant Association's 1995 Plant of the Year, and the 'Blue Spire' cultivar received the Award of Garden Merit from the Royal Horticultural Society. 1270d3563d == History == 1270d3563d ==

Description == 1270d3563d The species is in decline across its range due to habitat loss, and has been recognized as threatened or near threatened by several national and international organizations. 1270d3563d The U.S. Department of Energy's (DOE) Lawrence Berkeley National Laboratory (LBNL), SAGE's SageGlass technology could potentially reduce the size of building heating and air conditioning equipment size by up to 25%, which may lead to construction cost savings." 1270d3563d The species has a long history of use in traditional... 1270d3563d

Artemisia (plant) Common names for various species in the genus include mugwort, wormwood, and sagebrush. Artemisia comprises hardy herbaceous plants and shrubs, which Artemisia (art-ə-MEE-zee-ə) is a large, diverse genus of plants belonging to the daisy family, Asteraceae, with almost 500 species. species are called sages, causing confusion with the Salvia sages in the family Lamiaceae 1270d3563d

== Description == 1270d3563d Coastal sage scrub is characterized by low-growing aromatic, and drought-deciduous shrubs adapted to the semi-arid Mediterranean climate of the coastal lowlands. The community is sometimes called "soft chaparral" due to the predominance of soft, drought-deciduous leaves in contrast to the hard, waxy-cuticled leaves on sclerophyllous plants of California's chaparral communities. 1270d3563d Artemisia comprises hardy herbaceous plants and shrubs, which are known for the powerful chemical constituents in their essential oils. Artemisia species grow in temperate climates of both hemispheres, usually in dry or semiarid habitats. Notable species include *A. vulgaris* (common mugwort), *A. tridentata* (big sagebrush), *A. annua* (sagewort), *A. absinthium* (wormwood), *A. dracunculus* (tarragon), *A. abrotanum* (southernwood), and *A. herba-alba* (white wormwood). The leaves of many species are covered with white hairs. 1270d3563d *Salvia dorrii* is a woody subshrub reaching 10–70 cm (4–28 in) in height and width. The grey-green leaves are narrow and lanceolate, are tapered at the base and rounded at the tip generally without teeth or lobes. They are generally basal, and 1–3 cm (3/8–1+1/8 in) long. They have an intense but pleasant, mildly intoxicating minty aroma, with the scent released when the foliage is handled or crushed. The inflorescence is made up of spike-like clusters of numerous purple flowers that are bilaterally symmetric. Each cluster is 12–30 mm (1/2–1+1/8 in) across. Bracts are generally round 5–12 mm (1/4–1/2 in) long. Each calyx is usually 6–11 mm (1/4–3/8 in). The upper lip is most often round without teeth or lobes. The lower lip lobes are pointed without spines. The color is variable, blue to purple to rose... 1270d3563d Adult greater sage-grouse have a long, pointed tail and legs with feathers to the toes. The adult male has a yellow patch over each eye, is grayish on top

with a white breast... 1270d3563d Most species have strong aromas and bitter tastes... 1270d3563d

Salvia yangii 5–1. It is best known for its flowers. Its flowering season extends from mid-summer to late October, with blue to violet blossoms arranged into showy, branched panicles. 2 metres (1+1/2–4 feet) tall, with square stems and gray-green leaves that yield a distinctive odor when crushed. Russian sage, is a flowering herbaceous perennial plant and subshrub. Although not previously a member of *Salvia*, the genus widely known as sage, since 2017 it has been included within them. It has an upright habit, typically reaching 0. Although not previously a member of *Salvia*, the genus widely known as sage, since *Salvia yangii*, previously known as *Perovskia atriplicifolia* (), and commonly called Russian sage, is a flowering herbaceous perennial plant and subshrub 1270d3563d

Some botanists split the genus into several genera, but DNA analysis does not support the maintenance of the genera *Crossostephium*, *Filifolium*, *Neopallasia*, *Seriphidium*, and *Sphaeromeria*; three other segregate genera—*Stilnolepis*, *Elachanthemum*, and *Kaschgaria*—are maintained by this evidence. Occasionally, some of the species are called sages, causing confusion with the *Salvia* sages in the family *Lamiaceae*. 1270d3563d The company develops electronically tintable smart glass (also called electrochromic glass, EC, or dynamic glass), for use in building windows, skylights and curtainwalls, that can be electronically tinted or cleared to optimize daylight and improve occupant comfort in buildings. 1270d3563d The studio was founded in 1968 in New York City by Gary Kellgren and Chris Stone, who opened a Los Angeles branch the following year and a Sausalito, California, location in 1972. During the 1980s, Stone sold the New York and Sausalito studios; the former closed in 1987, the latter in 2008. The Los Angeles studio closed its doors in 2024. As of 2024, the Sausalito recording site operates as "2200 Studios". 1270d3563d
