Industry myths vary as to the origins of the name "grip". Some say it originated from the early days of the film industry when a production crew consisted of a director, camera person, assistants and workers. Workers acted as handymen, setting up all equipment needed, working from a kit, container or bag containing their tools. This bag was known as a "grip" and, as the industry evolved and workers began to separate into specialized groups, the name grip stuck with those that worked on rigging. It is most likely, however, that the term has origins in railway work, where "gaffers" and "grips" formed an integral part of the US rail transport system in the 19th century. The term "gaffer... 5a05d12c7d Testing involves a visual inspection of the equipment and verification that power cables are in good condition. Additionally, other tests may be done when required, such as a verification of earthing (grounding) continuity, a test of the soundness of insulation between the current-carrying parts, and a check for any exposed live metal that could be touched. The formal limits for a pass/fail of these electrical tests vary somewhat depending on the category of equipment being tested. 5a05d12c7d Cornish was born on May 27, 1947, into a military family in Oswego, New York, and spent her childhood in various locations around the United States. Cornish says she was drawn to feminism after reading *The Feminine Mystique*, describing the book's effect on her as "like a bomb had been dropped." After graduating from Cornell University in 1969 with a BA in literature, Cornish moved to the Puget Sound region and worked at The Shelter Half, a GI coffeehouse, as part of the anti-war movement in Tacoma, Washington. It was at this time that Cornish became involved with the labor, anti-war, and desegregation movements.
