

Lean To Storage Shed

Barn building. Linhay (linny, linney, linnies): A shed, often with a lean-to roof but may be a circular linhay to store hay on the first floor with either cattle

Circular linhay Linhay (rhymes with finny), also spelt Linny, is a type of farm building with an open front and usually a lean-to roof. front and usually a lean-to roof. Linhays were used to store hay above and shelter cattle (cattle linhay) or farm machinery (cart linhay). In Newfoundland English a linney is similar to a storage space, kitchen, or porch but as an addition to the rear of a house A circular linhay is an ancient type of structure found in England, particularly associated with Devon. In Newfoundland English a linney is similar to a storage space, kitchen, or porch but as an addition to the rear of a house, and in American English it is an open, lean-to shed attached to a farmyard

The shed is unusual in its construction because of its dominant spreading roof and double gabled entrance. It also uses internal columns as a principal means of support to create a vast internal space free of load bearing walls.

The word is recorded in English since 1481, as shadde, possibly a variant of shade. The word shade comes from the Old English word sceadu, which means "shade, shadow, darkness". The term... The cabin was added to the National Register of Historic Places on March 13, 1991. It is part of the Mount Rainier National Historic Landmark District, which encompasses the entire park and which recognizes the park's inventory of Park Service-designed rustic architecture. The shed is an important landmark of York and is a favourite subject for photographers and artists. Its "romantic abandoned appearance" makes it a popular spot for taking wedding photographs. The lean-to extensions were used as stables for the horses and it is possible to see the hollowed out tree trunks which acted as troughs. It is one of the few surviving vernacular structures of similar form and age in Western Australia.

Linhay Cattle linhays were used to house cattle in the winter with hay storage above. The hay was kept dry by the roof while at the same time acting as insulation for the livestock below, and was easily fed as daily rations to the cattle below by dropping it through openings in the floor directly into hay racks accessible to the livestock. It often has a lean-to roof, and the front generally consists of regularly-spaced pillars or columns. It is characterised as a two-storeyed building with an open front, with tallet or hay-loft above and livestock housing below. In American English a linhay is an open lean-to shed attached A linhay (LIN-ee) is a type of farm building found particularly in Devon and Somerset, South West England. Owing to the wide, open front, hay was easily thrown up into the tallet for storage after hay-making by a man standing on a hay-cart using a pitch-fork. A cart linhay stored carts and other farm machinery in place of livestock, with hay above. is a storage space, kitchen, or porch generally built as an addition at the rear of a house

== Etymology == Linhay in Barn § Other farm buildings often associated with barns Linhays are now largely obsolete as in England cattle are generally housed in large pole barns with corrugated iron or plastic roofs and are fed silage, either in large round bales or in troughs, chopped up by machinery. These modern structures make possible feeding and mucking out with...

Shed The main types of shed construction are metal sheathing over a metal frame, plastic sheathing and frame, all-wood construction (the roof may be asphalt shingled or sheathed in tin), and vinyl-sided sheds built over a wooden frame. Sheds may be lockable to deter theft or entry by children, domestic animals, wildlife, etc. Sheds used on farms or in the industry can be large

structures. Small sheds may include a wooden or plastic floor, while more permanent ones may be built on a concrete pad or foundation. A shed is typically a simple, single-storey (though some sheds may have two or more stories and or a loft) roofed structure, often used for storage, for A shed is typically a simple, single-storey (though some sheds may have two or more stories and or a loft) roofed structure, often used for storage, for hobbies, or as a workshop, and typically serving as outbuilding, such as in a back garden or on an allotment. Sheds vary considerably in their size and complexity of construction, from simple open-sided ones designed to cover bicycles or garden items to large wood-framed structures with shingled roofs, windows, and electrical outlets 9575b8de45
