History The Audi S5 was released in coupé form to the public at the same time as the A5. The Audi S5 Sportback was unveiled at the 2009 Frankfurt Motor Show, and went on sale in the spring of 2009 with a MSRP of €57,900.

Together with Konrad Schmidt Motorsport GmbH (SMS), who had been responsible for Audi's DTM version of the V8 quattro, Audi developed a sports version of the Coupé in September 1990 called the Audi S2. This was meant to boost lagging sales of the Coupé and as partial replacement for the famous Audi Quattro (launched in 1980). The front was revised to match the Audi V8, with new headlights and a grille with a body-coloured surround, a look which was then introduced on the entire Audi range before long. The S2 featured the well-proven 2.2-litre in-line five-cylinder 20-valve turbo petrol engine from the Audi 200 20V, which was a variant of the engine used in the Audi Quattro. A similar version of the engine was used in the Audi 100 based S4 (the 'Ur-S4'). The "RS" initials are taken from the German RennSport—literally translated as "racing sport", and is the Audi marque's highest trim level, positioned above the "S" model specification of Audi's regular model line-up. Like other Audi "RS" cars, the RS 4 pioneers some of Audi's latest advanced technology. It is only available with Audi's Torsen-based "trademark" quattro permanent four-wheel drive system.
