Intelligent design movement The movement arose out of the creation science movement in the United States, and is driven by a small group of proponents. " Its chief activities are a campaign to promote public awareness of this concept, the lobbying of policymakers to include its teaching in high school science classes, and legal action, either to defend such teaching or to remove barriers otherwise preventing it. The Encyclopædia Britannica explains that ID cannot be empirically tested and that it fails to solve the problem of evil; thus, it is neither sound science nor sound theology. Notice how my work is being presented as being in concordance with ID when The intelligent design movement is a neo-creationist religious campaign for broad social, academic and political change to promote and support the pseudoscientific idea of intelligent design (ID), which asserts that "certain features of the universe and of living things are best explained by an intelligent cause, not an undirected process such as natural selection. opposed to the "complex specified information" project of the ID creationists 453c8762f0
