The main variants of rice produced and grown in China encapsulates wild rice species of *O. Mereriana*, *O. Officinalis*, and *O. Rufipogon* and the main Chinese cultivated rice varieties are indica and japonica subspecies, with ongoing developments of rice breeding in hybrid... 4e1b5d2567

Upland rice The term “upland rice” refers to rice cultivated in non-flooded conditions, and it can encompass Upland rice (also called dry rice) is rice grown in dry-land environments. The term describes varieties of rice developed for rain-fed or less-intensely irrigated soil instead of flooded rice paddy fields or rice grown outside of paddies. flooded rice paddy fields or rice grown outside of paddies 4e1b5d2567

Condoleezza Rice " While Rice does not support same-sex marriage, she does support civil unions. In 2010, Rice stated that she believed "marriage. the Klan's night riders 4e1b5d2567

In the United States, the series airs on the Science Channel and is narrated by Chris Broyles. 4e1b5d2567 The term “upland rice” refers to rice cultivated in non-flooded conditions, and it can encompass various specific definitions. While most of the world's rice is grown in paddy fields or wet environments that require significant amount of water, rice itself does not inherently need flooding to thrive. However, flooded fields help ensure the ample water supply that certain rice

varieties require and assist in weed suppression. Upland rice, by contrast, is primarily rain-fed or lightly irrigated and is not reliant on flooded conditions. This category includes both specially bred varieties that are drought-tolerant and traditional rice varieties that have adapted to drier environment. The plants grow in shallow water in small lakes and slow-flowing streams; often, only the flowering head of wild rice rises above the water. The grain is eaten by dabbling ducks and other aquatic wildlife. Discovery Channel and Discovery Science in Italy. Nearly 100 million people depend on upland rice as their daily staple food. Almost two-thirds of the upland rice cultivation occurs in Asia, with Bangladesh, Cambodia, China, Northeastern India, Indonesia, Myanmar, Nepal, Thailand, and Vietnam all being... Discovery Channel, Science Channel, DMAX and Quest in the United Kingdom; == Introduction == Wild rice and domesticated rice (*Oryza sativa* and *Oryza glaberrima*) are in the same botanical tribe Oryzeae. Wild-rice grains have a chewy outer sheath with a tender inner grain that has a slightly vegetal taste. It is an important part of the national economy, where it is the world's second-largest producer of rice as of 2025. It produces the highest rice yields in Asia, at 6.5 metric tons per hectare (2.6 long ton/acre; 2.9 short ton/acre). Rice is produced throughout the nation and is believed to have been first domesticated in the surrounding regions of the Yangtze River and the Yunnan-Guizhou highlands of Southern China. Rice is believed to have been first cultivated around the Yangtze River Valley and Yellow River 11,000 years ago, and found upon clustering in the middle of the Yangtze River in the provinces of Hubei and Hunan in central China according to archaeological records. Rice production in China uses techniques, such as turning soil into mud to prevent water loss, as well as seed transplantation.

How Do They Do It? The show's slogan is "Behind the ordinary is the extraordinary. is a television series produced by Wag TV for Discovery Channel. Each programme explores how 2 or 3 ordinary objects are made and used. Each programme explores how 2 or 3 ordinary objects are made and used How Do They Do It. How Do They Do It. is a television series produced by Wag TV for Discovery Channel. " The series is broadcast throughout the world on various Discovery-owned networks including:

Discovery Channel in Asia, Australia, Belgium, Canada, France, Spain, Switzerland, and the Netherlands;

"The Rice Plant and How it Grows". China, India, and Indonesia are the largest consumers of rice. Rice yields can be reduced by pests including insects, rodents, and birds, as well as by weeds, and by diseases such as rice blast. Only some 8% of rice is traded internationally. A substantial amount of the rice produced in developing nations is lost after harvest through factors such as poor transport and storage. Asian rice was domesticated in China some 13,500 to 8,200 years ago; African rice was domesticated independently in West Africa about 3,000 years ago. Archived from

the original on January Rice is a cereal grain and, in its domesticated form, is the staple food of over half of the world's population, particularly in Africa and Asia. doi:10. 5 (2). Rice is the seed of the grass species *Oryza sativa* (Asian rice)—or, less commonly, *Oryza glaberrima* (African rice). and Developments. Traditional rice polycultures such as rice-duck farming, and modern integrated pest management seek to control damage from pests in a sustainable way. Rice has become commonplace in many cultures worldwide; in 2023, 800 million tons were produced, placing it third after sugarcane and maize.
