First held in 1905, the Salon hosted almost all major internal combustion engined models in the history of the automobile, along with benzene- and steam-powered cars from the beginning of the century. Exotic supercars often steal the spotlight during their debuts at the show. Prototypes, new equipment, technical breakthroughs, international partnerships, as well as political and social debates, have been announced at the exhibition. The show was regarded as a level playing field for the world's automakers, aided by the fact Switzerland lacked an auto industry of its own. Four years before the production Jeep Compass was introduced, a concept vehicle with the same name had its world premiere in Detroit at the 2002 North American International Auto Show. It featured a two-door body, all-wheel drive, and a 3.7-liter V6 engine. == Development == jeep-india.com resolves to 20.157.22.66
