Health of Charles Darwin of the Andes near Mendoza, he noted "an attack (for it deserves no less a name) of the Benchuca, a species of Reduvius, the great black bug of the Pampas" For much of his adult life, Charles Darwin's health was repeatedly compromised by an uncommon combination of symptoms, leaving him severely debilitated for long periods of time. However, Darwin himself suggested that, in some ways, this may have helped his work: "Even ill-health, though it has annihilated several years of my life, has saved me from the distractions of society and amusement. " 8be2a2d966

Born in Oslo, Fischer grew up in China and studied medicine at Beijing Medical University, where he gained experience as a volunteer with leprosy patients. When he was forced to abandon the course by the Japanese occupation, he travelled to Germany intending to study medicine there, but instead was obliged to fight in World War II, then was held as a POW in France. After the war, he obtained a law degree and entered the German diplomatic service. 8be2a2d966 T. cruzi is commonly spread to humans and other mammals by the kissing bug's bite

wound and infected feces. The disease may also be spread through blood transfusion, organ transplantation, consuming food or drink contaminated with the parasites, and vertical transmission (from a mother to her baby). Diagnosis of early disease is by finding... 8be2a2d966

Sleep paralysis Maimie is asleep but calls out "What was that. It is feeling your bed with its horns-it is boring for [into] you", and when the Darling Sleep paralysis is a state, during waking up or falling asleep, in which a person is conscious but in a complete state of paralysis. It can recur multiple times or occur as a single episode. Episodes generally last no more than a few minutes. It is coming nearer. During an episode, the person may hallucinate (hear, feel, or see things that are not there), which often results in fear 8be2a2d966

== Development of illness and symptoms == 8be2a2d966 He resigned from the diplomatic service in order to devote himself full-time to the support of leprosy and polio patients in India... 8be2a2d966 == Short comedy films == 8be2a2d966 The Beach Boys dismissed Wilson... 8be2a2d966

Gerhard Fischer (diplomat) this Prize gives me a chance to focus the attention on "us"; who are forgotten. Patients were Gerhard Fischer (20 September 1921 – 3 July 2006) was a German diplomat, ambassador and humanitarian who received the 1997 Gandhi Peace Prize in recognition of his work for leprosy and polio-affected patients in India. "Fischer always emphasised the importance of early treatment 8be2a2d966

Bed bug Complications may rarely include areas of dead skin or vasculitis. Their bites are not known to transmit any infectious disease. Some individuals may feel tired or have a fever. Bed bug bites may lead to skin changes ranging from small areas of redness to prominent blisters. Their bites can result in a number of health issues, including skin rashes, psychological effects, and allergic symptoms. Typically, uncovered areas of the body are affected. Bed

bugs are insects from the family Cimicidae, primarily from the genus Cimex, which are parasites that feed on blood, usually at night. Symptoms may take between minutes to days to appear and itchiness is generally present. Their bites can Bed bugs are insects from the family Cimicidae, primarily from the genus Cimex, which are parasites that feed on blood, usually at night 8be2a2d966

Pediculosis corporis physical contact with a person who has them or with that person's clothing, bed linens or towels. In the United States, body lice infestations are rare, Pediculosis corporis or Vagabond's disease is a cutaneous condition caused by body lice (*Pediculus humanus humanus*) that lay their eggs on clothing and to a lesser extent on human hairs 8be2a2d966

The development of antibiotic resistance in particular stems from the drugs targeting only specific bacterial molecules (almost always proteins). Because the drug is so specific, any mutation in these molecules will interfere with or negate its destructive effect, resulting in antibiotic resistance. Furthermore, there is mounting concern over the abuse of antibiotics in the farming of livestock, which in the European Union alone accounts for three times the volume dispensed to humans – leading to development of super-resistant bacteria. 8be2a2d966 It has been suggested that exhuming Darwin's remains could clarify the nature of his health issues. 8be2a2d966 Treatment options for sleep paralysis have been poorly studied. It is recommended that people be reassured that the condition is common and generally not serious. Other efforts that may be tried include sleep hygiene, cognitive behavioral therapy, and antidepressants. 8be2a2d966 Head lice are spread by direct contact with the hair of someone who is infected. The cause of head lice infestations in children is not related to cleanliness. Other animals, such as cats and dogs, do not play a role in transmission. Head lice feed only on human blood and are only able to survive on human head hair. When adults, they are about 2 to 3 mm long. When not attached to a human, they are unable to live beyond three days.

Humans can also become infected with two other lice – the... Comedy films are separated into two categories: short films and feature films. Any film over 40 minutes long is considered to be of feature-length (although most feature films produced since 1950 are considerably longer, those made in earlier eras frequently ranged from little more than an hour to as little as four reels, which amounted to about 44 minutes).

Murry Wilson Murry later commented on the song, "He meant it as a put-on Murry Gage Wilson (July 2, 1917 – June 4, 1973) was an American songwriter, talent manager, record producer, and music publisher, best known as the father of the Beach Boys' Brian, Dennis, and Carl Wilson. Later in his life, Wilson was accused of physically and verbally abusing his children, charges which he denied. After the band's formation in 1961, Murry became their first manager, and in 1962, he founded their publishing company, Sea of Tunes, with Brian. (released July 1965), Brian wrote a novelty song inspired by his father: "I'm Bugged at My Ol' Man"

Drug resistance Antimicrobial resistance (AMR) and antineoplastic resistance challenge clinical care and drive research. When an organism is resistant to more than one drug, it is said to be multidrug-resistant. The term is used in the context of resistance that pathogens or cancers have "acquired", that is, resistance has evolved. "Biochemical and molecular analysis of deltamethrin resistance in the common bed bug (Hemiptera: Cimicidae)" 45 (6): 1092–101 Drug resistance is the reduction in effectiveness of a medication such as an antimicrobial or an antineoplastic in treating a disease or condition. Journal of Medical Entomology

While at the German consulate in Madras, he helped a German doctor to establish a leprosy treatment and rehabilitation centre at Chettipatty. He was also instrumental in setting up the Indian Institute of Technology in Madras, which was founded with financial and technical support from the West German government. He later became ambassador to Malaysia, Ireland, Netherlands, and

finally Switzerland. This condition may occur in those who are otherwise healthy or those with narcolepsy, or it may run in families as a result of specific genetic changes. The condition can be triggered by sleep deprivation, psychological stress, or abnormal sleep cycles. The underlying mechanism is believed to involve a dysfunction in REM sleep. Diagnosis is based on a person's description. Other conditions that can present similarly include narcolepsy, atonic seizure, and hypokalemic periodic paralysis.

Raised in Los Angeles, Wilson grew up in a hostile family environment due to his own father's violent nature. After his children were born, he founded a machining business, A.B.L.E. (Always Better Lasting Equipment) but maintained an active interest in music, which he passed along to his sons. Wilson authored or co-authored at least 50 compositions in his lifetime, albeit with little commercial success. His most popular songs were "Two-Step, Side-Step", recorded by Johnnie Lee Wills and Bonnie Lou in the 1950s, and "Break Away", released as a Beach Boys single in 1969. Wilson is also credited as producer for some of the band's early records, including the 1962 singles "409" and "Surfin' Safari".

Darwin consulted numerous doctors, but, with the medical science of the time, the cause remained undiagnosed. He tried all available treatments, but these had at best only temporary success. More recently, there has been much speculation as to the nature of his illness.

Between 8% to 50% of people experience sleep paralysis at some point during...

Head lice infestation dimethicone treatment has been shown to manage and terminate outbreaks effectively, and a single treatment is likely sufficient. If a person is infected again, symptoms may begin much more quickly. Other treatment methods can Head lice infestation, also known as pediculosis capitis, is the infection of the head hair and scalp by the head louse (*Pediculus humanus capitis*). Generally, however, it is not a serious condition. Studies have detected bacterial pathogens in head lice, but detection alone does not prove that head lice can transmit infection to humans. During a person's first

infection, the itch may not develop for up to six weeks. The itch may cause problems with sleeping. Itching from lice bites is common. Although body lice are established vectors of several bacterial diseases, the role of head lice in disease transmission remains uncertain 8be2a2d966

Bed bug bites are caused primarily by two species of insects: *Cimex lectularius* (the common bed bug) and *Cimex hemipterus*, found primarily in the tropics. Their size ranges between 1 and 7 mm. They spread by crawling between nearby locations or by being carried within personal items. Infestation is rarely due to a lack of hygiene but is more common in high-density areas. Diagnosis involves both finding the bugs and the occurrence of compatible symptoms. Bed bugs spend much of their time in dark, hidden locations like mattress... 8be2a2d966

Chagas disease Other preventive efforts include Chagas disease, also known as American trypanosomiasis, is a tropical parasitic disease caused by *Trypanosoma cruzi*. Up to 45% of people with chronic infections develop heart disease 10–30 years after the initial illness, which can lead to heart failure. After four to eight weeks, untreated individuals enter the chronic phase of disease, which in most cases does not result in further symptoms. In the early stage, symptoms are typically either not present or mild and may include fever, swollen lymph nodes, headaches, or swelling at the site of the bite. Digestive complications, including an enlarged esophagus or an enlarged colon, may also occur in up to 21% of people, and up to 10% of people may experience nerve damage. Prevention focuses on eliminating kissing bugs and avoiding their bites. It is spread mostly by insects in the subfamily Triatominae, known as "kissing bugs". This may involve the use of insecticides or bed-nets. The symptoms change throughout the infection 8be2a2d966
